

AERONCA SEDAN 15AC, S15AC

MICRO Vortex Generator Kit

MICRO Vortex Generators for the Rogers (Aeronca) 15AC and S15AC Sedans are now FAA STC approved and ready for installation on your airplane. This jet age technology provides an 8% reduction in stall speed, improved aileron response, reduced landing and takeoff roll.

The **Micro VG Kit** consists of 88 Vortex Generators mounted full span on the wings, just aft of the leading edge, 38 VGs mounted on the vertical stabilizer, and 48 VGs mounted on the underside of the horizontal stabilizer. Included are installation tools, detailed drawings and instructions, templates for positioning VGs, spares, Loctite Depend adhesive and all the materials needed for the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade 6063-T6 aluminum, alodined to a Boeing mil-spec, ready for painting. The bottom of the VGs are curved to fit the contour of the wing surfaces and flat to fit the horizontal and vertical stabilizer surfaces.

When placing your order for a **Micro VG Kit**, please provide the Serial Number and N-Number. We can ship the same day if your kit is ordered Alodine, ready to be painted. We can paint the VGs to match your airplane for an additional \$200 per color. Painted kits will ship within 3 days. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- Improved Aileron Authority
- Improved Controllability
- Improved Characteristics
- FAA STC Approved
- Easy One Day Installation
- Kit Price \$950 plus S&H
