	Factory	MICRO	Improvement With MICRO VGs
$V_{mca}$	82 KIAS	74 KIAS	8 kts
$V_s$	83 KIAS	77 KIAS	6 kts
$V_{so}$	77 KIAS	71 KIAS	6 kts
$V_{ref}$	100 KIAS	92 KIAS	8 kts

### About MICRO Vortex Generators:

The **MICRO Vortex Generators** for the Baron 58TC and 58P are FAA STC approved and ready for installation on your airplane. This jet age technology provides near elimination of  $V_{mc}$ , a dramatic improvement in characteristics, reduced stall speeds, reduced accelerate/stop distance, and improved safety.

The **Micro VG Kit** consists of 104 vortex generators mounted on the wings, just aft of the boot line and on both sides of the rudder. The **Micro VG Kit** includes all of the installation tools and materials for your shop to make the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade aluminum and are alodined to a Boeing mil-spec, then painted to match your airplane before shipping.

As one twin owner said, "The **Micro VGs** do everything you said they would do and more -- the tail of my airplane thinks it's four feet taller and the rudder thinks it's two feet longer!"

When placing your order for a **Micro VG Kit**, please provide the Serial Number and N-Number. We can ship the same day if your kit is ordered Alodine, ready to be painted. We can paint the VGs to match your airplane for an additional \$200 per color. Painted kits will ship within 3 days. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- Improved Characteristics

- FAA STC Approved

- Reduced  $V_{mc}$

- Reduced  $V_s$ ,  $V_{so}$ ,  $V_{ref}$

- Easy One Day Installation

- Kit Price \$2450 plus S&H
