

Beechcraft 33

MICRO Vortex Generator Kit

About MICRO Vortex Generators:

The **MICRO Vortex Generators** for the Beech 33 Bonanza are now FAA STC approved and ready for installation on your airplane. This jet age technology provides a dramatic improvement in aileron response, reduced landing and takeoff roll, improved characteristics, reduced stall speeds, and improved safety.

Bobby Unser says, "The Micro VGs on my Bonanza are Utterly Magic! You must tell Bonanza owners that VGs provide a much smoother ride & great reduction in the fishtail yaw in rough air!"

The **Micro VG Kit** consists of 80 Vortex Generators mounted on the wings, just aft of the leading edge, 32 Vortex Generators mounted on both sides of the vertical and 60 Vortex Generators mounted on the underside of the stabilizer. The **Micro VG Kit** includes all of the installation tools, Loctite Depend Adhesive, and materials for your shop to make the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade aluminum and are alodined to a Boeing mil-spec.

When placing your order for a **Micro VG Kit**, please provide the Serial Number and N-Number. We can ship the same day if your kit is ordered Alodine, ready to be painted. We can paint the VGs to match your airplane for an additional \$150 per color. Painted kits will ship within 3 days. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- Reduced Vs, Vso
- FAA STC Approved
- Easy One Day Installation
- Improved Characteristics
- Improved Lateral Stability
- Kit Price \$1450 plus S&H
