

# Beechcraft Travel Air

## MICRO Vortex Generator Kit

### Improvement With MICRO VGs

$V_{mca}$	10 mph
* $V_s$	5 mph
* $V_{so}$	4 mph

### About MICRO Vortex Generators:

\* SPEEDS MEASURED FULL FORWARD CG ON MODEL E95 AT 4200 lbs.

The **MICRO Vortex Generators** for the Travel Air are FAA STC approved and ready for installation on your airplane. This jet age technology provides a significant reduction of  $V_{mc}$ , a dramatic improvement in characteristics, reduced stall speeds, reduced accelerate/stop distance, and improved safety.

The **Micro VG Kit** consists of 94 vortex generators mounted on the wings, just aft of the boot line and on both sides of the tail. The **Micro VG Kit** includes all of the installation tools and materials for your shop to make the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade aluminum and are alodined to a Boeing mil-spec, then painted to match your airplane before shipping.

As one twin owner said, "The **Micro VGs** do everything you said they would do and more -- the tail of my airplane thinks it's four feet taller and the rudder thinks it's two feet longer!"

When placing your order for a **Micro VG Kit**, please provide the Serial Number and N-Number. We can ship the same day if your kit is ordered Alodine, ready to be painted. We can paint the VGs to match your airplane for an additional \$150 per color. Painted kits will ship within 3 days. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- Reduced  $V_{mca}$
- Reduced  $V_s$ ,  $V_{so}$
- Easy One Day Installation
- Improved Characteristics
- Kit Price \$1950 plus S&H
