

CESSNA 150F-M & 152

MICRO Vortex Generator Kit

STALL SPEED REDUCTION

NO FLAPS:	6 MPH
40° FLAPS:	3 MPH

The **MICRO Vortex Generators** for the Cessna 150F, G, H, J, K, L, M, A150K, A150L, A150M, 152, and A152 are now FAA STC approved and ready for installation on your airplane. This jet age technology provides a reduction in stall speed, improved aileron response, reduced landing and takeoff roll.

CFII Dick Britton has this to say about Micro VGs:

- "Improved controllability at slow speed"
- "More perky - gets off the ground quicker"
- "Improved stability - a more stable ride"

The **Micro VG Kit** consists of 88 Vortex Generators mounted on the wings, just aft of the leading edge and 26 Vortex Generators mounted on the vertical stabilizer. The kit includes the STC, detailed drawings and instructions, templates for positioning VGs, spares, Loctite Depend adhesive and all the materials needed for the easy one day installation except a bottle of isopropyl alcohol, a ladder and a roll of paper towels.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade 6063-T6 aluminum, alodined to a Boeing mil-spec, ready for painting. Each VG is curved on the bottom to fit the contour of the wing.

When placing your order for a **Micro VG Kit**, please provide the Serial Number and N-Number. We can ship the same day if your kit is ordered Alodine, ready to be painted. We can paint the VGs to match your airplane for an additional \$200 per color. Painted kits will ship within 3 days. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- **Reduced STALL SPEED 8%!**
- **Improved Characteristics**
- **Improved Controllability**
- **FAA STC Approved**
- **Easy One Day Installation**
- **Complete Kit**
- **Kit Price \$695 plus S&H**
