

NEW IMPROVED PIPER J-3 and PA-11 MICRO VORTEX GENERATORS

- Reduced Stall Speed
- Improved Controllability
- Improved Characteristics
- Improved Crosswind Control
- Easy One Day Installation
- FAA STC Approved
- Upgrade kit available for previous Micro VG kit

VORTEX GENERATORS ON WINGS:
Energize the boundary layer to allow controlled flight at a slower speed.

VORTEX GENERATORS ON UNDERSIDE OF HORIZONTAL STABILIZER:
VGs on underside of stabilizer improve elevator authority.

VORTEX GENERATORS:
Are made of aircraft-grade aluminum. The kit includes advanced adhesive, computer-cut templates and can be installed in only one day.
