

NEW IMPROVED MICRO VG KIT FOR SUPER CUB

Here is the new and improved Micro Vortex Generator kit:

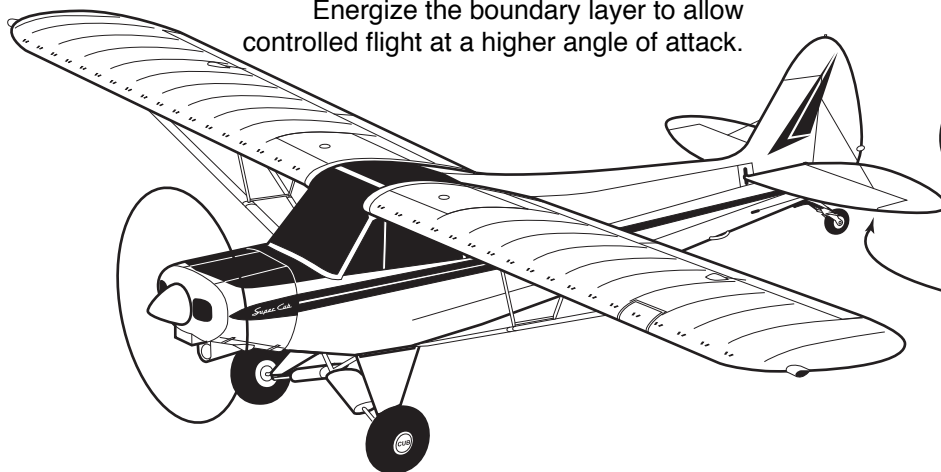

1. Micro VGs full-span, wings, fuselage to wing tip
2. Micro VGs full-span, bottom of horizontal stabilizer

and
PA12

This New configuration is what was used on the two competition Cubs to win first place in Alaska, Montana, and California:

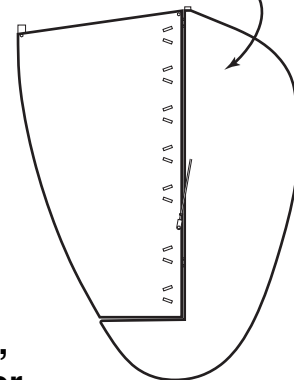

1. Jerry Burr: N7037H.....J3.....Short Landing.....1st place
2. Denny Martel: N810DM.....PA18.....Short Takeoff.....1st place

WING VORTEX GENERATORS:
Energize the boundary layer to allow controlled flight at a higher angle of attack.

STABILIZER VGs:
Bottom of horizontal to improve controllability. Provides the very best "Moose Stall" solution.

The New Micro VG kit consists of 72 Vortex Generators mounted on the wings, just aft of the leading edge full-span, and 28 Vortex Generators mounted on the underside of the stabilizer, full-span. Included in this kit are installation tools, detailed drawings and instructions, templates for positioning VGs, spares, Loctite Depend adhesive and all the materials needed for the easy half day installation.
